

Drainage – Cambridge American Cemetery

Project details:

The American War cemetery, which had flooded for years, now drains successfully into a nearby stream. Bury Landscapes used 4/8mm loose Lytag[®] lightweight aggregate with a Shelton's gravel bander. The water, and the graves, are now assessable at all times.

Project:

The Cambridge American Cemetery and Memorial

Date:

2003 - 2004

Client:

U.S. Government

Main Contractor:

Bury Landscapes
