

## Structural – Gloucestershire Constabulary HQ

### Project details:

A new state of the art (£15.25 Mil), four storey, police HQ, providing over 8500m<sup>2</sup> of accommodation for 400 staff.

The building, open plan, with a street running through it, provides maximum benefits in terms of space efficiency, light and flexibility. Lightweight concrete was used for weight reduction to reduce column size and location. Lytag<sup>®</sup> 4/14 lightweight aggregate was used.
